

# Business Management Account

Bank South Pacific

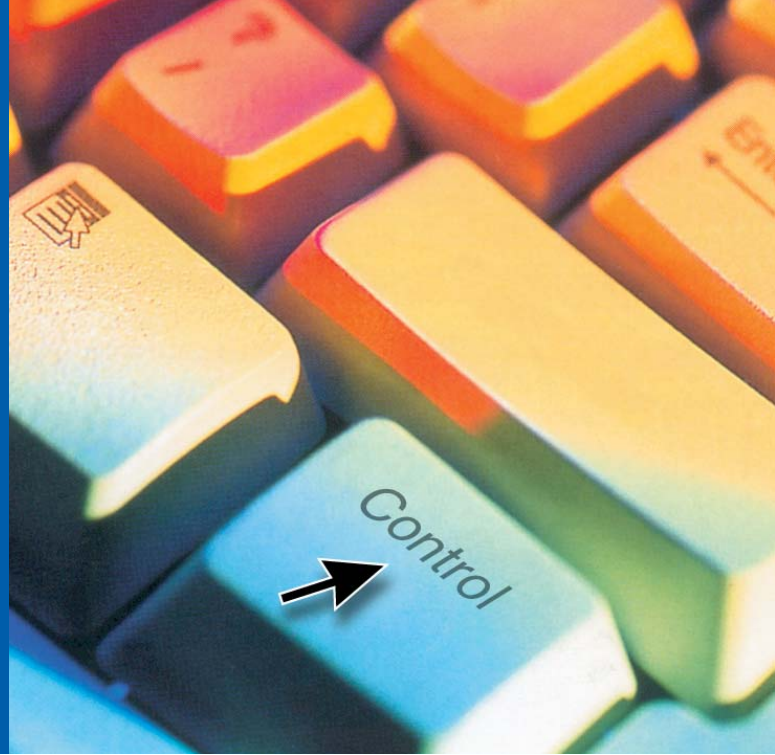

The flexible investment account that gives your business a highly competitive return.

Bank South Pacific

"OUR BANK"

Bank South Pacific  
Business Management  
Account is a  
higher interest bearing  
investment account  
with the flexibility  
of at call access  
to your funds.

### Key features

Our Business Management Account is the ideal solution for any business that expects a highly competitive return on their money.

#### ***Earn an investment rate of interest***

The Business Management Account interest rates are reviewed regularly in accordance with money market rates, ensuring that you earn the most up to date return on your money.

Interest is calculated on a tiered rate structure which means that as your balance passes a certain point every Kina in your account earns the new higher rate. Effectively, the more you invest the more interest you earn.

Interest is calculated daily on every Kina you invest and credited to your account quarterly.

#### ***Funds available at call***

You can move funds in and out of your account with the convenience of cheque book access, giving you complete control of your funds.

No balance restrictions apply to the Business Management Account so you can invest amounts that suit the needs of your business.

You can also keep up to date with your account transactions by receiving regular statements. A monthly statement is issued automatically, however this can be changed to another cycle if required.

#### ***Fee free***

To help cut the cost of your banking, you receive 25 free debits and 25 free credits on your account each month.

As our Business Management Account is an investment account this is more than adequate for the needs of most businesses.

Furthermore, no account keeping fee or statement charges apply.
